Press Release

To all valued business partners:

We are very excited to announce our new partnership with Impulse Radar. Being able to offer the PinPointR GPR to our customers fulfills our commitment that we at Tracer Electronics take very seriously, i.e., to always offer our customers the best products with the best performance for the best value. The PinPointR from Impulse Radar offers leading edge technologies like Dual-Frequency Radar antennas, wireless tablet display technology, (RTS) Real-Time Sampling technology and its high quality and ruggedized and weather resistant compact mechanical design. These unique features provide a level of performance we have never seen before on any GPR cart. The PinPointR is extremely easy to use, offers long battery life, best-in-class features and can see targets that other GPR systems simply cannot see and is one of the most affordable in the marketplace today. Tracer Electronics LLC will also become a USA service center for the PinPointR.

We look forward to showing you this new product in action.

Regards,

Ken Smith
